

PRODUCT DESCRIPTION	FEATURES, ACTIONS & BENEFITS
VIQ MYERS COCKTAIL	Invented by Dr Myers at Hopkins. An intravenous vitamin infusion which comes pre-mixed so you are guaranteed to get the optimum amount of nutrients in the perfect quantity and quality. Enhances immunity, reduces fatigue and gives adrenal fatigue support. Helps with seasonal allergies and reducing symptoms of fibromyalgia, migraines, asthma and blood pressure. Gives a much needed energy boost.
VIQ SKIN LUMINANCE BOOST	Known as the master anti-oxidant, glutathione is used to detoxify the body and boost the immune system. It may also produce skin brightening and give a glow to the skin. With added vitamin C, a potent antioxidant that can help to boost your immune system's performance.
VIQ SKIN LUMINANCE ROCKET	Known as the master anti-oxidant, glutathione is used to detoxify the body and boost the immune system. It may also produce skin brightening and give a glow to the skin. This DOUBLE DOSE has added vitamin C
VIQ COVID DRIP	Use the long haul Covid drip to boost your immune system to help deal with post syndrome issues after overcoming COVID-19. Outpatient medical providers have observed many patients who have recovered from COVID-19 and then go onto experience a post-viral type of syndrome. These patients experience debilitating fatigue, headaches as well as a delayed overall recovery. We have had several clients dealing with these post-syndrome issues after overcoming COVID-19. Contains Zinc, NAC, Vitamin C and a powerful antioxidant.
VIQ COVID DRIP – BOOST	Our Covid Immunity IV Drip is a comprehensive solution to alleviate any COVID-19 symptoms you're facing while also bolstering your immune system and providing much-needed hydration to your entire body. This drip includes Zinc, Gluthathione and Vitamin C - DOUBLE DOSE
VIQ IMMUNE BOOSTER	Use the Immune Boost drip if you need to improve your immune system. Zinc, B12, B complex, vitamin C and magnesium are all included in this IV infusion. These nutrients boost your immune system, which can help you stay healthy and meet the day-to-day demands of a hectic lifestyle. Vitamins and nutrients continue to flow through your bloodstream after an immunological drip, providing for long-term results.
VIQ FAT BURN	Use Fat Burn to accelerate breakdown of fat. The concentrated doses of carnitine and supplements accelerate weight loss and fat burning. This is an excellent way to accelerate metabolism of fats when you are on a weight loss diet. The course of treatment includes weekly injections over 4 weeks. Carnitine is an essential amino acid that promotes endurance, protects muscle damage, improves cognitive function and regulates blood sugar levels. It carries fatty acids into the mitochondria, where the body burns energy. According to the American Chemical Society (ACS) carnitine encourages weight loss and enhances fat burning. Since carnitine is largely found in animal sources, vegans and vegetarians may suffer from deficiency. Using this treatment regularly assists in maintaining and optimising their carnitine levels.
